

CITY OF LIVINGSTON ORGANIZATIONAL STRATEGIC PLAN 2019-2024

APPROVED 05 MARCH 2019

What is an Organizational Strategic Plan?

Strategic planning is an organizational management activity that is used to set priorities, focus energy and resources, strengthen operations, ensure that employees and other stakeholders are working toward common goals, establish agreement around intended outcomes/results, and assess and adjust the organization's direction in response to a changing environment. It is a disciplined effort that produces fundamental decisions and actions that shape and guide what an organization is, who it serves, what it does, and why it does it, with a focus on the future. Effective strategic planning articulates not only where an organization is going and the actions needed to make progress, but also how it will know if it is successful. A strategic plan is a document used to communicate with the organization the organizations goals, the actions needed to achieve those goals and all of the other critical elements developed during the planning exercise. ¹

How will the City of Livingston Use its Strategic Plan?

The main users of the strategic plan will be City employees as they make decisions to reach the goals provided by the City Commission. However, the strategic plan also serves to communicate City activity to the Commission and the Community. The status of each action will be updated on a regular basis allowing both the Commission and the Community to follow the progress of the City in the actions and strategies outlined in the plan. Additionally, the plan itself will come before the Commission annually for additions, deletions, and revisions to ensure the strategic plan is a current reflection of the Commission's goals and a relevant document over time. The ability to see progress as it happens will allow staff, commissioners, and citizens to easily track the success of the plan and to identify areas that need new strategies or actions to be successful.

3. Infrastructure

Build and maintain infrastructure now and into the future in a strategic and responsible manner that promotes and sustains existing neighborhoods and accommodates growth.

Strategic Infrastructure

In analyzing the strategic infrastructure needs of Livingston, seven categories of infrastructure were identified: essential, facilities, foundational documents, IT and emergency communications, vehicles and equipment, solid waste, and parks and trails. Each of these categories was examined to determine the most pressing infrastructure needs and then all the categories were combined to create a 24 item, prioritized list of infrastructure needs. While the list is prioritized, available resources affect the expected completion dates of each project meaning that some lower priority projects will be accomplished before higher priority projects. The final table of priorities is provided below with the priorities divided by category provided as background information.
